

INCLINED TUBE MANOMETER

ACCESSORIES AND OPTIONS

- Scale in other units than Pa. e.g., mm W.C.
- Special scale markings
- Customers logo
- Printed with other texts
- Hoses

Model DPA

The inclined tube manometer is intended for use in applications where measurement of low pressure and differential pressure is needed or in monitoring applications where clear and reliable reading must be made from a distance. Its design makes the instrument highly suitable for applications involving occasional differential pressures exceeding the measuring range.

FEATURES

- Clear and easy reading
- Good contrast
- Zero adjustment screw
- Large filling liquid reservoir
- Metering liquid does not blow out during momentary overloads
- Due to the construction metering liquid does not evaporate during overloads
- Provided with filling liquid, mounting screws and instructions

TYPICAL APPLICATIONS

- Air conditioning strainers
- Blowers
- Dust filters
- Pressurized enclosures
- Draught measurement in furnaces
- Laboratories

INCLINED TUBE MANOMETER

Technical data DPA

Metering liquid	Red, hydrocarbon mixture, $\rho=0,78$
Weight (incl. liquid)	500 g
Body	Acrylic (PMMA)
Connectors	Polycarbonate (PC)
Seals	Nitrile
Max. overload	5-30 x measuring range (depends on the way of mounting)
Max. static pressure	10 bar
Ambient temperatur	-40 ... +50 °C
Accuracy	$\pm 5\%$ F.S. of inclined range
Connections	For 4-6 mm hose (inside diameter)

DPA-		
	Inclined scale	Vertical scale
100P	0 - 100 Pa	100 - 400 Pa
200P	0 - 200 Pa	200 - 500 Pa
300P	0 - 300 Pa	300 - 500 Pa
500P	0 - 500 Pa	

WELL TYPE MANOMETER

ACCESSORIES AND OPTIONS

- Scale in other units than kPa. e.g., mm W.C.
- Special scale markings
- Customers logo
- Hoses

Model DPP

The well type manometer model DPP is intended for reliable monitoring and accurate measurement of low pressure and pressure differential in applications where good clear visual indication is required. The well type manometer has a wider range than inclined tube manometers. It is suitable for use in laboratories, high-pressure fans, filters and for flow rate/velocity measurement in the field as well as laboratories.

FEATURES

- Clear and easy reading
- Good contrast
- Zero adjustment screw
- Large filling liquid reservoir
- Provided with filling liquid and mounting screws

TYPICAL APPLICATIONS

- Air conditioning strainers
- Blowers
- Dust filters
- Pressurized enclosures
- Laboratories
- Flow rate and velocity measurement
- Annealing furnaces
